SHAHD SOLIMAN ELAMROUSY

01030571765 | shahadsoliman464@gmail.com

PROFESSIONAL SUMMARY

Motivated Microbiology graduate (B+, Very Good) from Tanta University with hands-on practical experience in microbiological sample analysis, laboratory procedures, water quality monitoring, and GMP-relevant documentation. Experienced in identifying and quantifying microorganisms including E. coli and Pseudomonas spp. in real-world environmental samples. Adept at technical reporting, cross-functional communication, and structured problem-solving. Seeking to contribute quality control / assurance and microbiological testing operations as part of a passionate and innovative pharmaceutical team.

CORE TECHNICAL COMPETENCIES

- Microbiological sample collection, handling, and analysis
- Identification and quantification of microorganisms (E. coli, Pseudomonas spp., and others)
- Environmental monitoring and microbiological quality control
- Laboratory documentation, reporting, and deviation recording
- Basic blood sample analysis and handling techniques
- Understanding of GMP principles and quality assurance protocols
- Water quality microbiological testing and safety monitoring
- Analytical thinking and structured problem-solving

EDUCATION

Bachelor of Science — Microbiology Department
Faculty of Science, Tanta University (TU)
2022 – 2026 | Grade: A

RELEVANT EXPERIENCE

Intern — Microbiological Analysis | *Water & Wastewater Company* Jan 2025 – Apr 2025

- Performed microbiological analysis on 20+ water samples, identifying and quantifying microorganisms including E. coli and Pseudomonas spp., directly contributing to community water safety monitoring.
- Observed and documented multiple water treatment methods including chemical coagulation and filtration techniques, applying microbiological quality standards throughout.
- Assisted in describing and recording the function of key treatment machines including sedimentation tanks, aerators, and chlorinators — building foundational knowledge of environmental microbiological control relevant to pharmaceutical production environments.
- Maintained accurate, structured records and reports for each analysis, reflecting GMP-aligned documentation habits.

Trainee — Analysis Laboratory | *Analysis Laboratory* Aug 2024

- Performed blood sample collection and handling procedures, practicing aseptic technique, sample integrity, and laboratory safety standards.
- Developed proficiency in basic microbiological analysis workflows, reinforcing understanding of testing protocols and quality control documentation.

ADDITIONAL PROFESSIONAL EXPERIENCE

Member, Data Analysis & AI Track | *Hanker Rank Community* Feb 2026

- Developed analytical and data interpretation skills relevant to managing and presenting microbiological test results and QA reporting.

PR & Business Development Member | *Rally Community* June 2026

- Strengthened professional communication, teamwork, and stakeholder management skills applicable to cross-departmental collaboration in a pharmaceutical environment.

Member, PR Team | *UCCD — American Chamber of Commerce in Egypt* June 2025

- Enhanced communication, crisis management, and professional reporting skills, supporting clear and accurate information flow — transferable to deviation and complaint reporting in microbiology QA.

Internship — Medical Sales | *Parkville & Rameda Pharmaceutical Companies* Aug 2024 – Sep 2024

- Gained foundational knowledge of the pharmaceutical industry including market dynamics, customer expectations, and product compliance — providing relevant context for working within a pharma environment like EVA Pharma.
- Practiced presenting technical information clearly and confidently to diverse audiences.

Member, Undergraduate Researchers Initiative (URI) | *URI* June 2024

- Applied structured academic research methodologies, reinforcing scientific thinking, documentation accuracy, and report-writing skills directly applicable to microbiological investigation and compliance reporting.

COURSES & CERTIFICATIONS

- Health & Safety Course (20+ hrs) — American Chamber of Commerce in Egypt (UCCD), Sep 2024: workplace safety standards, hazard identification, risk assessment, OSHA guidelines, fire safety, and emergency procedures — directly relevant to pharmaceutical laboratory safety compliance.
- Professional English Course (30+ hrs) — American Chamber of Commerce in Egypt (UCCD), Oct 2024: professional communication, technical writing, and presentation skills.
- Psychological Selling Skills — Udemy Academy, Sep 2024: consultative communication and relationship management.

SKILLS

- Microbiology: sample collection and handling, microbial identification, environmental monitoring, water quality analysis
- Laboratory safety and documentation practices aligned with GMP principles
- Microsoft Office: Word, Excel, PowerPoint — for data recording, reporting, and presentations
- Native Arabic | B1/B2 English — reading scientific literature and professional communication
- Strong interpersonal and communication skills — experienced in cross-functional teamwork
- Detail-oriented, organized, and able to manage multiple tasks under deadlines
